

Paraclipse®

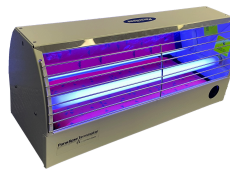

Sure, they're attractive. But, what really matters is what's inside.

Insect Inn Ultra II™

Fly Patrol™

Terminator™

Mosquito Eliminator™

Paraclipse® Fly and Mosquito Elimination Systems

Our Patented CAPTURE CARTRIDGE™ Sets the Standard

Paraclipse has solved all the inefficient, disgusting and messy limitations of glue boards and zappers with our exclusive CAPTURE CARTRIDGE™.

Each **CAPTURE CARTRIDGE™** constantly presents a fresh adhesive surface using our exclusive auto advance system. As insects become trapped, they are rolled into the receiving end of the cartridge.

When it's time to dispose of the filled cartridge, the trapped insects are contained inside the cartridge housing for clean and sanitary handling.

The perfect solution for everyone you need to please:

- To the public, they are attractive designer lights.
- To flies, they are an irresistible source of UV light, sex, food and decoy attractants.
- To you, they are a clean, sanitary insect capture system unlike any other.
